## LESSLESS — JEAN NOUVEL 1994

1—  
2

LessLess is a complete range of tables, rectangular and square, painted in different colors. An aluminium table the strength of which lies in a play on corners and folds. The external outline of the horizontal table top is very thin and stiffness and it is obtained by bending the aluminium sheet along inclined planes. Designed originally for the Fondation Cartier in Paris, the LessLess tables stand out for intrinsic elegance and light lines in every environment.
