

PASS-WORD EVOLUTION — DANTE BONUCCELLI 2014 / 2019 / 2021

1—
19

Pass-Word Evolution is the living system designed for the contemporary home. The design evolves drastically to perceive new ways of using the rooms of a contemporary house, inspired by multiple compositional and functional traits, combinations of full and empty volumes, which ensure extreme design freedom and an original expressive quality.

FINISHES

The drawer interior (sides and bottom) are faced in Batik melamine ecru or slate (specify when ordering).

* The doors and front pieces of drawers, matt and glossy lacquer colours, always have a handle in the same finish as the panel (pewter / iris metal handles, applicable on request without extra charge).

For wooden front pieces, on the other hand, a metal handle is available (pewter / iris), or a wooden handle.

Dimensions in millimeters and inches. The right to discontinue and make changes is reserved. This information is based on the latest product information available at the time of printing.

TECHNICAL INFORMATION

STORAGE UNITS

UNIT STRUCTURE, PARTITIONS

Chipboard panel covered with melamine facing.

OPEN COMPARTMENT

Medium-density fibreboard panel covered with Eucalyptus (*Eucalyptus globulus*) or Oak (*Quercus*) wood veneer or melamine laminate, painted in the colours in the Molteni range.

DOORS, DRAWER FRONT, UNIT FINISH

Chipboard panel covered with Eucalyptus (*Eucalyptus globulus*) or Oak (*Quercus*) wood veneer or melamine laminate painted in the colours in the Molteni range.

UPPER MARBLE COVERING

Marble in the finishes in the range with stain-resistant, water-repellent treatments.

SKIRTING

Chipboard panel covered with melamine facing. With adjustable plastic feet.

BASE WITH FEET

Painted metal tubes with chrome-plated or painted die-cast aluminium feet. With plastic floor support adjusters.

HANDLE

Made of painted extruded aluminium or covered with Eucalyptus or Oak wood veneer.

GLASS PARTITIONS

Extra-clear transparent glass, TH 8 mm.

DRAWER INTERIOR SIDES AND BOTTOM

Melamine finished chipboard panel.

GLASS TOP

Tempered glass, TH 10 mm, with screen-printed band.

WALL UNIT WITH DOORS – WOOD PARTS

Chipboard panel covered in Eucalyptus or Oak wood veneer or melamine laminate, painted in the colours in the Molteni range.

Attachment elements made of painted metal.

WALL UNIT WITH DOORS – GLASS PARTS

Extruded or painted aluminium. Tempered glass TH 4 mm.

LIGHTING AND ELECTRICAL PARTS

All components comply with regulations and are certified as indicated on the individual parts.

TECHNICAL INFORMATION

SHELF WITH BACK / INDIVIDUAL SHELF

BACK PANEL (FOR SHELF WITH BACK)

Chipboard panel covered with Eucalyptus (*Eucalyptus globulus*) or Oak (*Quercus*) wood veneer or melamine laminate painted in the colours in the Molteni range. Metal brackets for wall installation.

SHELF AND PERIMETER PROFILE (FOR INDIVIDUAL SHELF AND WITH BACK)

Made of painted extruded aluminium.

DISPLAY SHELF

TOP

Chipboard panel covered with Eucalyptus (*Eucalyptus globulus*) or Oak (*Quercus*) wood veneer or melamine laminate painted in the colours in the Molteni range.

WALL PANEL

Chipboard panel covered with painted melamine. Metal brackets for top support.

BACK RISER, UNDER-TOP CHANNEL

Made of painted extruded aluminium.

DISPLAY CASE

BASE, COVER AND BACK

Chipboard panel covered with painted melamine. Rear metal brackets for wall attachment.

DOORS, SIDE PANELS AND SHELVES

Made of painted extruded aluminium joined with metal brackets. Extra-clear or Stopsol transparent tempered glass, TH 4 mm.

WEIGHT LIMITS

Wall-mounted storage units

Maximum loads distributed uniformly as per drawing:

Module W 940/1100 50 kg	Module W 1410/1650 90 kg
----------------------------	-----------------------------

Display shelf

Maximum total load uniformly distributed, 30 kg.

Shelf with back / Individual shelf

Each shelf has a maximum load capacity of 15 kg per linear metre, uniformly distributed.

Horizontal wall-mounted display case

Maximum total load uniformly distributed, 15 kg.

Wall-mounted display case

Maximum total load uniformly distributed on the shelves, 8 kg.

MODULARITY

Modularity of base/storage unit structures

Pass-Word Evolution base and storage unit structures, except for flush sliding models, can be used alone or set next to one another as shown in the diagram.

The upper and lower covering is complete and covers up to a width of 3000 mm.

Compositions with metal base can have a maximum length of 4420 mm.

In sizes from 2370 to 3320, the metal base has a central foot.

In sizes from 3390 to 4420, the metal base has two central feet.

No reductions of any kind are possible.

The W 470/550 structure can be set next to the W 1410/1650 structure (ex. **A**) or next to a module with an open compartment (ex. **B**) (ex. **C**).

Example **A**

Example **B**

Example **C**

Example **D**

The structures with a glass top may be single or in same sized pairs (940 + 940 or 1100 + 1100)

The structures with W 470/550 can never be used alone or set together with other identical structures. They must only be set together with W 1410/1650 modules or modules with open compartment.

The W 235/275 open compartment can never be positioned outside of the composition.

DATASHEET

REGISTERED
DESIGN

2026

TOP - JOINING METHOD

For worktops longer than 3000 mm, is it possible to make the joint as shown in the following examples.

In wood-finish compositions, the joint in the worktops will be assessed by the Molteni Technical Office in relation to the composition of the front piece.

GS
The covering is jointed in correspondence with the joints in the structures

GCM
Covering joint at the centre of the unit (obtaining 2 pieces of the same size) - Example A
The central joint can only be made at the centre of W 940/1100 compartments
In wood-finish compositions, the joint in the worktops will be assessed by the Molteni Technical Office in relation to the composition of the front piece.

GCM
The covering is jointed at the halfway point of the central element W 940/1100 for non symmetrical compositions (we obtain 2 pieces that have almost the same measurements, as close as possible) - Example B
In wood-finish compositions, the joint in the worktops will be assessed by the Molteni Technical Office in relation to the composition of the front piece.

Examples with glass tops

WEIGHT LIMITS

Suspended storage units D 385 (15 1/8") - H finished 310/500 (12 1/4" / 19 5/8")

Suspended storage units are made with structures in 2 heights: 290 (11 3/8") and 480 (18 7/8"). To complete the composition, it is obligatory to use the upper, lower and side coverings. It is possible to create open compartments with the specific element.

No reductions of any kind are possible.

The wall-mounted storage units never come with a bronze glass top.

The W 470 (18 1/2") / (550 (21 5/8")) structures can **never** be used alone or set together with other identical structures. They must only be set together with W 1410 (55 1/2") / 1650 (65") modules or modules with open compartments.

In wood-finish compositions, the joint in the worktops will be assessed by the Molteni Technical Office in relation to the composition of the front piece.

EXTERNAL LED LIGHTING SYSTEM FOR FLOOR-STANDING MODULES

- LED lights 2700°K
- Profiles with single light available up to a max length of 3000 mm. For longer lengths, we will supply two profiles joined half-way.
- Can be turned on using a connection to a controlled switch or with the (optional) remote control kit.
- For floor-standing structures, only the upper led is available.
- The external LED lighting system can be connected to the internal LED light of the structure with glass top using a single power supply unit, after checking the power in watts.

Floor-standing structures with external lighting system

The lighting system is made up of a frame with a horizontal LED holding profile and side profiles to be fixed to the structure.
See diagram below.

SINGLE SHELVES

Wall fastening (with adjustments) takes place using special hidden brackets.
Plates must be anchored to the wall using state-of-the-art procedures on walls in masonry (solid wall or hollow brick).

The dealer is responsible for help in choosing the right tools to safely perform every type of operation and guarantee safety and capacity (**kg 15 per linear metre, uniformly distributed**).

We recommend a very scrupulous evaluation of the structural conditions of the wall prior to ordering and mounting the product.

Molteni&C is not responsible for mounting procedures that do not comply with the instructions above.

Shelves can be custom made in width (min. 950 / max. 2770) and cannot be reduced in depth.

Each shelf can, if required, be outfitted with an upper or lower LED lighting bar.

Please specify when ordering.

For the best installation result, we suggest providing electrical connections in the rear part as shown in the drawing below.

The removable front carter is provided with a compartment that can house power supply units, connector, and remote control kit.

SUPPORT SHELVES

Support shelves are mounted on the wall with special plates. Plates must be anchored to the wall using state-of-the-art procedures on walls in masonry (solid wall or hollow brick). The dealer is responsible for help in choosing the right tools to safely perform every type of operation and guarantee safety and capacity (**Kg 30 per linear metre, uniformly distributed**).

We recommend a very scrupulous evaluation of the structural conditions of the wall prior to ordering and mounting the product.

Molteni&C is not responsible for mounting procedures that do not comply with the instructions above.

On request, a kit with chemical anchors is available, as indicated on the following page (minimum wall thickness 100 mm).

The support shelf is completed with a wall panel and, on the top, a rise with wire passage in predefined positions (see diagram).

The wire passage is included in the price and if a support shelf without wire passage is requested, no increase will be considered.

For sizes 2560 and 2770 mm, is it possible, on request, to provide multiple wire passages in the predefined positions, considering a surcharge each.

The rise can be fitted with an LED lighting bar, including power supply unit, to be connected to a controlled switch or to the (optional) remote control kit.

The lower part of the support shelf can receive conduit for electrical wires.

The conduit is mandatory in the presence of LED lighting bars and wire passages.
